

Axioo On — Device On Event API

API Technical Documentation

Development URL

https://register.axiooworld.com/beta/axioo_on/

Authentication

All endpoints (except [index](#)) require a **Bearer token** in the **Authorization** header.

```
Authorization: Bearer <token>
```

Endpoints

1. `POST /create`

Log a device power-on event with geolocation data.

Request

Method	Content-Type
POST	`application/x-www-form-urlencoded` or `multipart/form-data`

Parameters

Parameter	Type	Required	Description
`serial_number`	string	**Yes**	Product serial number
`latitude`	float	No	Latitude of device location (e.g. `-6.2088`)
`longitude`	float	No	Longitude of device location (e.g. `106.8456`)
`accuracy_meters`	float	No	GPS accuracy in meters (e.g. `12.5`)

Example Request

```
POST /Axioo_on/create
Authorization: Bearer eyJhbGciOiJIUzI1NiIs...
Content-Type: application/x-www-form-urlencoded

serial_number=SN1234567890&latitude=-6.2088&longitude=106.8456&accuracy_meters=10.0
```

Success Response (HTTP 200)

```
{
  "result": 0,
  "message": "Save succeed"
}
```

Error Responses

`result`	`message`	Condition
-1	Undefined token	Missing or empty `Authorization` header
-1	Invalid token	Token not found in

result	message	Condition
-1	In Active userId or apiKey	Token exists but `status = inactive`
-1	Expired token	Token's `expiredDate` is in the past
-1	Serial number must be filled	`serial_number` is empty or not provided
-1	Failed to save. Please try again.	Database insert failed (insert_id <= 0)

HTTP 200 (always – errors are returned in JSON body)

Example error:

```
{
  "result": -1,
  "message": "Serial number must be filled"
}
```

2. `POST /get\_device\_on`

Return the latest 50 device-on records as JSON.

Example Request

```
POST /Axioo_on/get_device_on
```

Response

```
